

WINTER COAT

For walks in the winter (40° F and below) – keep your dog warm and protected!

FUNCTIONAL FORM

Designed with your dog's body in mind – the Winter coat is fitted around the rear and hips with our unique contoured back that provides maximum coverage for their bare bottom with no restriction on movement and comfort. The under-part is unobstructed to accommodate your dog's bodily function and to prevent urine/fecal stain.

LEASH OPENING

There is an opening to slip the leash through for easy attaching to the collar for those winter walks.

QUALITY MATERIAL

Our winter coat is made with durable Ultrex (water proof) and lined completely with U.S. made 200 weight Polar Fleece. These high quality materials keep your dog protected from the Winter cold. The extra stitching allows the coat to be used on a daily basis and ensure longevity of the coat. The Winter coat is also machine washable for your convenience.

REFLECTIVE PATCH

We place a reflective patch for high visibility in the back of our Winter coat as extra protection for you and your dog during dusk/night walks.

CHEST BAND & TURTELNECK

This Polar Fleece attachment covers the chest area that tends to need extra coverage. The turtleneck provides warmth and protection for the neck and ear region. It can be folded down or pulled up over the ears.

COUNTERBALANCE BACK STRAP

This unique counterbalance back strap is strategically placed to keep our coat from shifting as your canine moves resulting in maximum coverage, protection and comfort. The position of the strap allows your dog full range of motion with comfort.

WIDE 3-VELCRO BAND STRAP

Our Winter coat is secured with this under-belly wide band strap that provides coverage for the stomach area and is ideal to get a snug fit for warmth. The three Velcros band allows the coat to be easily placed on / taken off your dog and is adjustable to adapt to a changing girth.

MACHINE WASHABLE
